

Your Guide to Rebuilding a Donald A. Gardner House Plan

If you are planning on building a Donald A. Gardner house plan more than once, be sure you know your options before purchasing plans!

When you purchase five or more sets of plans, you are given a license to build. The terms of this license vary depending upon the plan package you purchase.

If you purchase...

Reproducible Vellum or PDF – Reproducible vellum or PDF is your best value if you intend to make changes to the plan. **The purchaser of the plan is permitted to make an unlimited number of copies to build the home one time.** License is not transferrable.

AutoCAD Drawings on CDROM – AutoCAD drawings are electronic files on CDROM that make up a complete set of construction drawings for the home design of your choice. **The purchaser of the plan is permitted to make an unlimited number of copies of the plan set to build the home one time.** License is not transferrable.

8 Set Plan Package – Eight sets of the same plan is your best value if you plan to build the home a single time. Eight set packages come with a license to build a single home from the plans. You are not permitted to make copies of the plans, however, you may purchase additional sets for a nominal cost. If you decide to build the home again, contact the Donald A. Gardner Customer Sales & Support department at 800.388.7580 to purchase another license to build, within two years of the original purchase.

5 Set Plan Package – Five sets of plans is the minimum number of plans required for purchase in order to receive a construction license to build the home a single time. You are not permitted to make copies of the plans, however, you may purchase additional sets for a nominal cost. If you decide to build the home again, contact the Donald A. Gardner Customer Sales & Support department at 800.388.7580 to purchase another license to build, within two years of the original purchase.

Study Set – Study sets are a great way to get a closer look at a Donald A. Gardner plan or estimate cost to build, however, they are NOT FOR CONSTRUCTION. A minimum 5-set package must be purchased to receive a license to build one home. Study sets may be upgraded to building packages (5-set, 8-set, vellum, PDF or CD) within 90 days of original purchase, with payment of a nominal upgrade fee plus the difference in cost between the study set and building package.
